# Introducing the JCB Backhoe Loader range

JCB brings you the most extensive range of backhoe loaders there is. And that means, when you come to us, you'll get exactly the right machine for the job, no matter what the size. Tough and reliable, with unmatched productivity and versatility, and continuing technological advances driven by customer needs: it's easy to see why these machines enjoy such amazing popularity.

At the small end of the range is the new JCB Mini, the smallest backhoe loader JCB has ever built. It features a 2.54m (8ft 4in) dig depth backhoe and 0.25 cu.m (0.33 cu.yd.) loader capacity. At only 1.5 tonnes weight this compact machine is easily trailer towed from site to site.

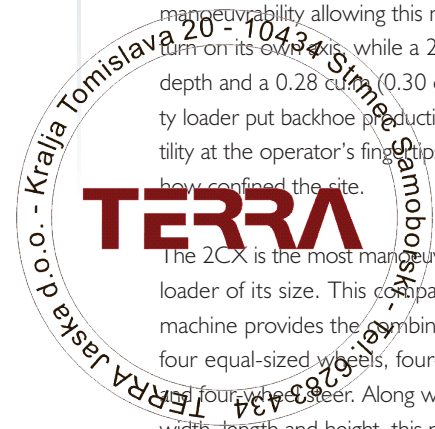

The next model in the range is the 1CX, with the added advantage of skid steer manoeuvrability allowing this machine to turn on its own axis, while a 2.5m (8ft) dig depth and a 0.28 cu.m (0.30 cu.yd.) capacity loader put backhoe productivity and versatility at the operator's fingertips, no matter how confined the site.

The 2CX is the most manoeuvrable backhoe loader of its size. This compact and stable machine provides the combined benefits of four equal-sized wheels, four-wheel drive and four-wheel steer. Along with its reduced width, length and height, this means you can benefit from renowned JCB performance in sites that were previously inaccessible.

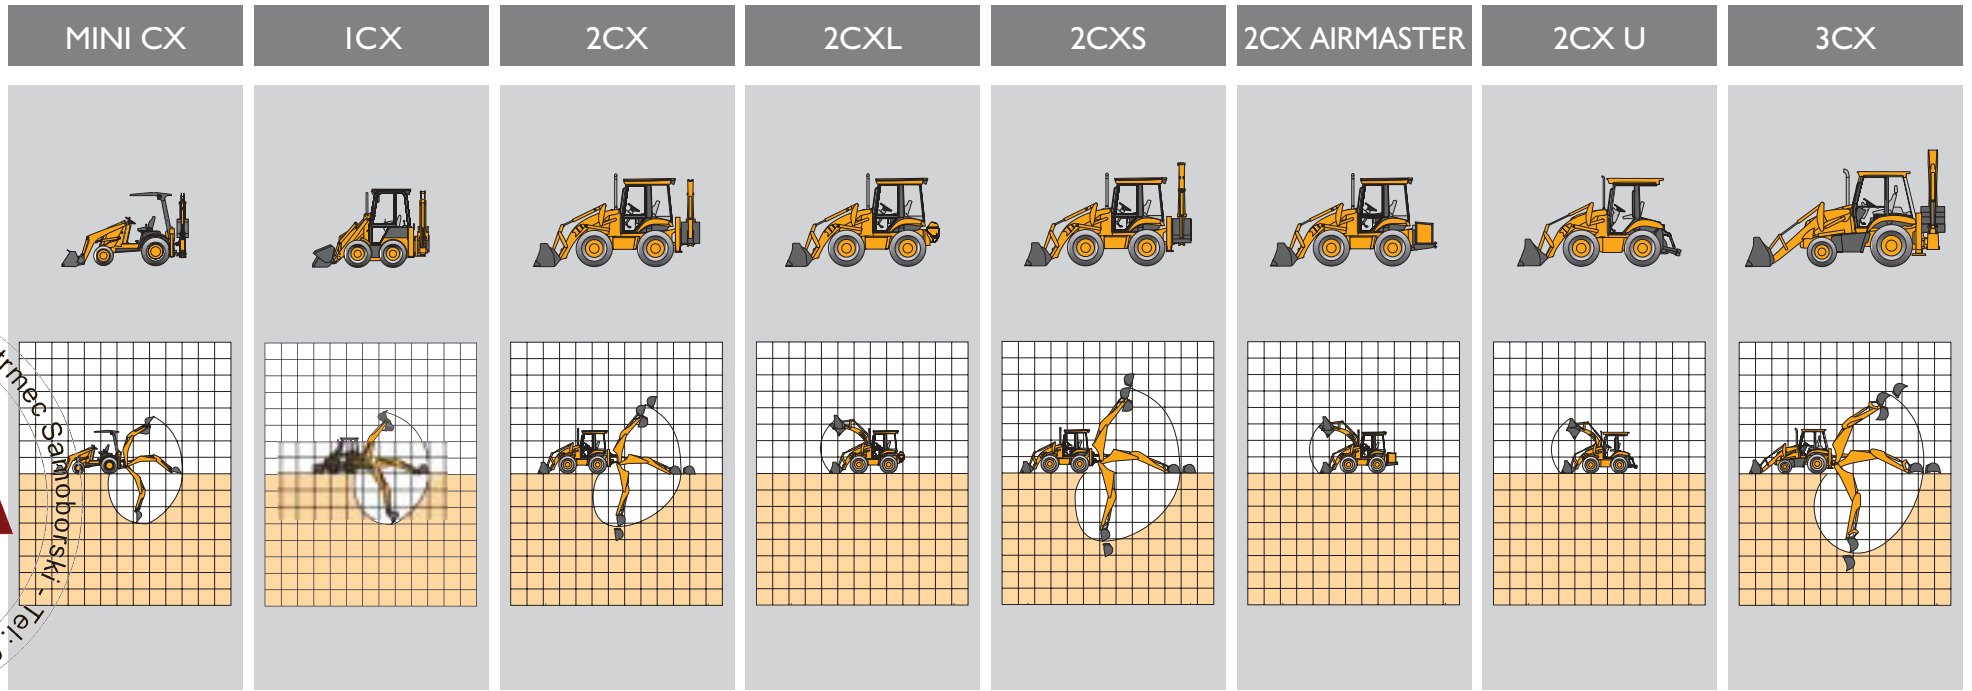

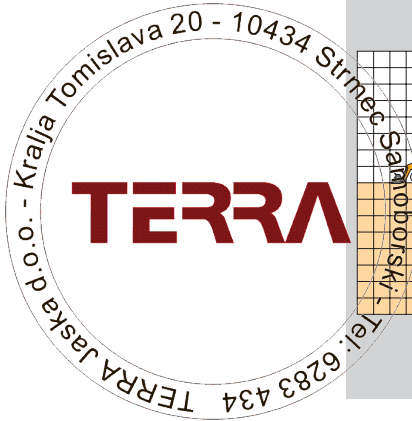

Also within this range of machines is: the 2CXL, a compact 4x4x4 loading shovel; the 2CX Air Master, a mobile compressed air machine that's very widely used in the road laying industry; and the 2CXU, a utility machine with a three-point hitch and 540 rpm power take off capable of running mowers and other PTO driven attachments.

Then there's the 3CX and 4CX at the bigger end of the spectrum. Featuring a tough, powerful and easy-to-use excavator arm with dig depths ranging from 4.24m (13ft 11in) fixed dipper on the 3CX through to 4.98m (16ft 4in) on the 4CX Super. The option of precision controls is offered throughout, giving the 3CX and 4CX range unrivalled control and visibility, and class-leading productivity. The 4CX gives you four-wheel drive, four-wheel steer and four massive, equal-sized wheels which provide higher flotation and excellent pushing power. And there's the 4CX Super with its impressive dig-depth of 16ft 4in and un-matched loader performance.

The whole range gives you amazing power, performance, productivity, operator comfort, complemented beautifully by the added versatility you get from the front-end of a JCB backhoe loader.
