

JCB TRACKED EXCAVATOR | JZ140

A Product
of Hard Work

FAST FACTS

- **Zero Tail Swing** - the JZ140 boasts the shortest tail swing around and a full-swing radius that's one of the best in its class.
- **Full size cab** - for ease of operation the JZ140's full-size operator cab gives this compact machine added comfort.
- **Outstanding lift capacity** - superb stability provides a higher lift capacity than you'd expect from a machine in this class.
- **Excellent visibility** - the full-size JCB auto range cab, coupled with a low-line body and counterweight, provides the operator with an exceptional all-round view so it's easier to position the machine and load quickly, accurately and safely.
- **Performance power** - a 72.8kW (98hp) Isuzu engine and best-in-class drawbar pull, means these machines are able to travel however poor the ground conditions.
- **Real reliability** - Japanese components are proven to give a longer life and top quality electrics ensure trouble-free operation.
- **Hassle-free maintenance** - these machines are designed to keep working to the maximum: anti-slip foot plates and steps increase maintenance safety; standard JS excavator service components optimise availability of spares and support customers running mixed fleets; 1000-hour greasing intervals on boom-base and boom-to-dipper pins reduce service costs; and there's best-in-class access to service points.
